

Actually I've never thought about how to write my CV, but now I could have a chance to think about myself and CV. and I could understand objectives of session very clearly.

I enjoyed the fact that this activity gave me an opportunity to ~~look~~ think about my future in a creative way. The session's objective were very clear. By. With the aid of the tasks given we were able to express ourselves and team up with others in order to produce something. I think it would be great if we did things like this more often.

It was fun to work with a group and put all our work together, The session objectives were clear but it was better when Alan explained further.

the session helped me understand design thinking more clearer ~~in~~ because what ever we creat can have a great narrative.

I was enjoying planning my future and organise my early life. It was follow the process how to thinking design with LEGO. So, it was really easy to understand and helpful.

I really liked the idea of a metaphorical CV made of LEGO.

You have explained everything well and the whole experience was enjoyable and beneficial in terms of understanding 'myself' through a creative process.

the groups though would benefit from some walls breaking because sometimes it was hard to share.

1) enjoyed being able to be creative and not just having to sit and listen the whole time → engaging.

2) —

3) session objectives were clear!

4) Helped with design thinking as we all produced such different things showing how unique we all are

5) Help with actual CV writing along with it.

I really enjoy to play with this LEGO. It is a unique experience because it is the first time when I do this thing at school.

This play helps me to discover new and amazing things about me.

I enjoyed the fact that everyone had to use their imagination and describe themselves.

It was good to see how other people use their imagination -

- It could have been improved by using more time to do our projects.

I really liked the session. It made me think and be creative. I think there should be more time so more people can present what they have made. It really helped me think about my future job which will be really helpful.

①. I enjoyed the freedom of being and creating legos and representing them as my ideas. It was fun.

② There's isn't something that I didn't enjoy to be honest. I would say I wasn't quite sure what to say. ⑤ I think it was good

③ Yes it was clear ④ it really made <sup>easy</sup> be brainstorm ideas

Enjoyed myself, thought it was a fun way of showing what's on our minds for the future.

Objectives were clear. The session helped explain what Toby meant. Could have explained a little more to do with our assignment.

really did enjoy it - even though at first i was a little confused about the whole concept. it made sense and was fun.

I like LEGO PLAY session and it makes me ~~can~~ creative to produce ideas in my ~~me~~ brain. The session ~~is clear~~ objectives were clear.

It was fun!

I've never think that use Lego to make a CV!!

and It helps me to cooperate with my new classmate!

I like the session!

## Feedback

I enjoy very much because it reminds me about my childhood and In my childhood, I always can become creative, but now I'm lack of that ability, this class can let me find ~~my~~ back my creativity.

I enjoyed playing with Lego  
Lego makes everything better.

Nothing, there was Lego

Yes objectives were clear

It made me more creative in the way that I view things and now I think others will view them.

Overall a useful + FUN Lesson

I like Lego a lot so I enjoy Lego serious play

I think we need activity thing like this.

This is better than just listening lecture

It helpfull to focus on class student

The idea of using Lego as a representation of the lecture's objectives was very unique & creative which helped me understand the point of making a creative or. It was strange at first but when we paired up, it was nice creating

I enjoyed this session.

Objectives were clear.

It helped me create narratives and engage the session rather than just sitting and listen and watch PPT.

I hoped ~~lego~~ concept Lego can be prepared.

① I enjoyed the creativity of this lesson, as it allowed me to explore, and ~~go into~~ think about my future and what I aspire to achieve, as I haven't really thought about it.

② Yes the lesson objectives were clear

③ It helped me understand that breaking down problems is an easy way to solve them

④ I liked the lesson, ~~so~~ nothing I can think of.

1. never played lego before, so it's new to me and it's interesting
2. My LEGO is not that pretty as I am bad at making things
3. Yes.
4. Understand people's thinking and ideas
5. more interaction (maybe)

## Feedback.

I enjoyed the elements of using the lego as it is very creative and you can make almost anything

I didn't enjoy that there wasn't enough lego ☹️

The session object was clear. The session helped me to understand that being creative you can do anything. I would have improved the session by having more lego.

## Feedback

- \* Find the subtle Lego (partner)
- \* I'm so enjoy the process...
- \* We can find others advantages.
- \* We can have a conversation →

I enjoyed that I spent time and thought about how to ~~plan~~ <sup>make</sup> my lego, my put my idea, my creating creativity in it.

Yes, they were clear.

by working together.

Stimulating my creativity.

Through this class, I think the power of group work could be more effective than individual work. Because all of us ideas ~~together~~ are all different.

It is fun playing with Lego and learning with different combo. Objective cleared and it helped me think deeply of design thinking. This session can be improved by explain it clearer

It's very interesting session, never had a Lego session before. And it's my first time play LEGOs.

I feel like it's a really creative idea to make CV with LEGOs

Creative but

Takes much time

but it was  
allright

I really like everything about this course and module.

This session help me to understand design thinking more creatively and clear.

1. I <sup>was</sup> enjoy in think of my future.
2. I didn't enjoy in do my task alone.
3. I think the session objectives is clear.
4. It helps me thinking about how to start design thinking.
5. I think it can make more cooperation.

Yes, I enjoy this class and  
session objectives clear. ~~is~~  
And this session would  
increase my creativity.

I've never played with lego before  
and I really did enjoy it because  
this you can improve creativity and  
actually think while playing. It is  
useful because while creating  
something you have to think how  
to put all parts so they can fit  
perfectly which is problem solving.

It was nice for thinking about future steps.  
Actually, I didn't know what should I do when I get lego.  
Because, ~~even though~~ I don't like creat something.  
However, I love it!

Feedback,

The session was good fun, it had clear relevance to what the session was about. Including lego ~~at the end~~ ~~some~~ made it interesting.

Next time:

I'm not a fan of sharing and being put on the spot

I think this session really useful for me.

Firstly, it can help me to understand Creative.  
Next, I can know how to design your thinking.  
Finally, you can enjoy it.

It's a good idea to create make the class be more funny.

I enjoyed being able to be creative and imaginative with the lego.

\* the objectives were clear

I was enjoying making future with lego. It recalls my childhood.

I wasn't enjoying watching screen, because my need is not flexible.

This session make clear what this module want

\* it was fun seeing how people think and how people can collaborate ideas and put them together

It's interesting to create and design something by ourselves. But it's hard to cooperation with classmates cause we're too shy to share ideas.
